HEARING INFORMATION

* Hearing Assessment

Hearing tests are performed for all patients 9 months and older.

General assessment comprises: pure tone audiogram and/or visual reinforcement audiology tympanometry (middle ear function), speech, acoustic reflexes (stapedius reflex as a first line to identify retrocochlear pathology).

HEARING AID/DEVICE OPINION/FITTING

Includes hearing test-Private & Pension(OHS) patients. DVA Gold Card

Educational Hearing Screening*

(5-11 years of age)

Includes hearing assessment, listening in background noise (AFG) and Short Term Auditory Memory (STAM).

* LisN-S

(6 years and up)

Used to assess auditory skills in children (spacial or vocal cues) who may be having difficulty listening to & following speech in the classroom. Also an assessment of Short Term Auditory Memory (STAM)

Swim Plugs

Fitting of pre-moulded Doc's plugs or custom fit ear plugs, waterproofing for children/ adults with tympanic membrane perforations or ventilation tubes.

Noise/Work/Musician's Ear Plugs

Noise Reduction - Custom moulded sound reducing ear plugs. Premium hearing protection. Reduce sound to a safe level without sacrificing sound quality.

Musician In Ear

In Ear custom made speakers for superior sound quality.

Phone to ask if a referral is required. 0-15yrs doctor/school/parent may refer.
